

CANNABASICS 101

Understanding the 2019 Cannabis/Marijuana
Laws of California

MARIJUANA AND PREGNANCY

IS MARIJUANA SAFE IN PREGNANCY? NO!

- Using marijuana while you are pregnant can cause low birth weight and brain problems in newborns.
- The brain continues to develop up until the age of 25. Therefore marijuana can permanently negatively impact the development of the brain.
- Unborn babies are exposed to high THC content through the placenta. THC exposure to an unborn child can affect brain growth, which can increase the risk of schizophrenia, depression, and addiction.

Rethinking Access to Marijuana
